

React Native Developer Responsibilities:

- Design and implement user interface components for JavaScript-based web and mobile applications using React ecosystem
- Work as a part of a small team that includes other react native developers, designers, QA experts, and managers
- Build app and UI components from prototypes and wireframes
- Work with native modules as and when required
- Use Native APIs for tight integrations with both platforms – Android and iOS
- Write automated tests to ensure error-free code and performance
- Improve front-end performance by eliminating performance bottlenecks
- Create front-end modules with maximum code reusability and efficiency
- Implement clean, smooth animations to provide an excellent user interface
- Work with third-party dependencies and APIs
- Work with Redux architecture to improve performance of the websites/mobile apps
- Coordinate with the cross-functional teams to build apps in stipulated time/budget.

Technical Skills Of React Native Developer:

- Significant experience working with React web and mobile along with tools like Flux, Flow, Redux, etc.
- In-depth knowledge of JavaScript, CSS, HTML, functional programming, and front-end languages
- Strong knowledge of React fundamentals such as Virtual DOM, component lifecycle, and component state

- A complete understanding of the full mobile app development lifecycle right from prototyping
- Knowledge of type checking, unit testing, typescript, prop types, and code debugging
- Experience working with REST APIs, document request models, offline storage, and third-party libraries
- Strong understanding of web technologies like JavaScript, HTML, and CSS
- Knowledge of user interface design and responsive designs
- Well-versed in a variety of React Native software and technologies such as Jest, Enzyme, ESLint, and so on

Non-Technical Skills Of React Native Developer:

- Strong knowledge of software development approaches, principles, and flows
- Experience working on large, complex web and mobile apps
- Ability to create and maintain smooth continuous integration and continuous delivery pipeline of React Native applications
- Understanding of React Native best principles and design aesthetics
- A positive mindset and continuous-learning attitude
- Stay updated with new updates, technologies, and news of React Native
- Ability to solve issues and contribute to libraries as and when needed
- Experience working in an agile development environment
- Strong verbal and written communication skills to communicate strategy
- Familiarity with modern front-end tools and building pipelines
- A collaborative approach to build apps and solve complex problems
- Attention to detail and problem-solving skills
- Client-focused approach with a goal of creating user-centric designs
- Good interpersonal, communication, and collaboration skills

- Ability to write clean, well-documented code that follows good coding practices
